

In another column we publish an article entitled "Plan to cut out 1913 tobacco." We publish this article, not that it voices our opinion on the subject, but because we have been requested to do so, by the Barley Protective Society. As for a cut out in 1913 or any other year is not apt to have any serious consideration in Washington county. Our crops have been good and consequently have commanded good prices. Higher prices have been paid for tobacco in the past two years on this market than were ever heard of before, not excepting war times. There is in our humble opinion, nothing to be gained by a cut out of the crop. It will do us no good to have high prices for tobacco when we have none. We are well aware that other states can not raise as good tobacco as we can, but they can raise it, besides we do not believe in wanting too much. Prices now brought by good tobacco are as high as the most anxious could wish, and the lower grades are in proportion. Of course, most tobacco does not bring fancy prices. No the people of Washington county are not willing to kill the hen that lays the golden egg.

Mrs. Virgie Fields, Administratrix.

Then They Hit Up the Strip.

"While on a waters tour in connection with certain investigations of the committee on Indian Affairs, Senator Carroll R. Page of Vermont happened to get in conversation with a man at Ashland, Wis.

"From Vermont" chuckled the man. "Why, I was born at Swanton, Vt."

"So was I," said the senator.

"My father ran a store on Merchants' row in Swanton."

"So did mine," replied the Vermont senator.

"My father dealt in hides and wool."

"So did mine," echoed the senator.

"My father was a member of the firm of Page, Barlow & Co."

"So was mine," cried Senator Page, with a twinkling in his eye. "Shake!" and they shook.

In this unexpected way the sons of the old Vermont partners had met after 40 years, and tradition has it that they went off quietly in arm for a feast of maple syrup, in memory of childhood days at Swanton in the old Green Mountain state—Joe Chapin's Newsletter.

The Burnt Child.

A real clergyman missed one of the parishioners several successive Sundays from his place in church and when he met the absentee one day he said:

"Well, William, I haven't seen you at church for some time."

"No, sir. I have reasons for staying away."

"Oh, you have! And what may your reasons be? I should like to explain them away, if possible."

"Well, sir, I don't want to manage that. They are rather delicate objections. The first is that I don't believe in hell where one does all the punishing."

"The second is that I don't believe in so much sin as we get in your church; the third, and last, and most important reason, is that I believe in your church that I got my wife!"

LAN CUT OUT 1913 TOBACCO

Organization Formed in Kentucky to Increase Price of Tobacco

APPEAL TO OTHER STATES

To Co-operate With Growers of Kentucky in Their Effort to Obtain Living Prices for the Product of Their Land and Labor.

An Appeal to Farmers: On October 10, there met in the Phoenix Hotel, Lexington, Ky., a small band of farmers from less than a dozen counties. They met for the purpose of discussing a cut out of the 1913 tobacco crop.

On account of the busy season many large producing counties were not represented, but several of them sent encouraging messages. After due deliberation it was agreed to organize the "Barley Protective Society" and to push the cut out movement for all it is worth.

Mass conventions were advised for the various counties on Saturday, October 12, and a general convention of the growers at Lexington, Ky., was ordered for Wednesday, October 23.

The county mass conventions are to select delegates to represent them at the general convention on the 23d.

A committee, composed of representatives from Bath, Franklin, Scott and Owen counties, was selected for the purpose of preparing "An Appeal" to growers, and the following is the result of their labors.

KEEP TALLY OF STITCHES

Workman From Missouri Finds There Are 2,500 Stitches in the Needle in a Single Garment.

Kansas City, Mo.—Herman Aron, a tailor, took time to count the stitches in the last coat he made. It found 2,500 machine stitches and 9,137 hand stitches—he announced the other day.

The coat was a four-button sack, thirty-two inches long and single stitched.

Extensive Use of Tally: It is about 60 years since the custom of the tally was introduced into the system of work. It is now used by all the tailors in the world. The tally is a small piece of wood, about the size of a match, and is used to count the stitches. The tally is used by the tailor to keep a record of the number of stitches in each garment. The tally is used by the tailor to keep a record of the number of stitches in each garment. The tally is used by the tailor to keep a record of the number of stitches in each garment.
